

Panels Plus is your wall and floor panel equipment source. Our equipment provides your company with a streamlined process resulting in faster and more efficient production.

We have expanded our line of equipment to include steel wall and floor panel equipment. We offer framing, squaring and sheathing options in both wood and steel wall panels. The newest in the line is our floor section machines.

From wood construction to light gauge steel construction we offer the best options in the market. Our tried and true semi automated lines stand up to the test of time and are easy to operate and maintain.

We are the one stop shop for all you panel equipment needs. Check us out at our website and YouTube.
