This building in West Salem, WI, is a merchandising building located in a new industrial park. The building design and general contract work was done by Brickl Brothers Design/Build General Contractors of West Salem, WI. WTCA member Select Trusses & Lumber, Inc. then engineered and manufactured the roof trusses for the structure. Daniel Pogreba is the General Manager at Select Truss, and he commented on the round shape of the roof. "You don't see a lot of round roof systems anymore, and when you do they catch your eye."

"The unique difference in these trusses is that we not only had an exterior radius on the top chord, but also an interior radius in the bottom chord," added Pogreba. "Also, we trimmed the top and bottom chords, so they were perfectly smooth and only required one layer of plywood sheathing on the top chord and more importantly, one layer of drywall sheathing on the interior radius. As you can see, this roof also had a metal roof on it and it was perfectly smooth after it was installed." **SBC**

ITW Building Components Group Inc.

Hardware and Software Solutions from Alpine

eSHOP, real-time truss plant management tools.

- Manage costs from job-bids to final delivery
- Detailed, accurate production information and reports
- Track your people, equipment, lumber and material more efficiently
- Material inventory and projections – instantly!
- Exchanges Data with most equipment and software

Speed Cut Express, Increases Quality and Production

- Cuts costs and boosts productivity
- Turns your radial saw arm into a fast and efficient tool
- Computer control system automates and standardizes many saw functions
- Significantly reduces set-up and processing time
- Increases consistency, accuracy and quality

AutoMill HP, High Performance from the industry's most productive and accurate component cutter.

- Set up time less than 12 seconds; Average set up time 4 to 5 seconds!
- Computer controlled security – no limit switches
- Low Maintenance
- User friendly

AutoSet C4, the automated truss assembly solution.

- Set up in 30 seconds – or less!
- Build a new truss every 3 minutes
- Increased speed and productivity
- Lower costs with True Servo Technology
- Keeps table slots clear for easier maintenance
