Behind the Scenes at SBCRI

SBCRI has the flexibility to house many different assemblies, systems and even enclosed structures, but they don't build themselves. Each new project requires a team of hard working, heavy lifters to tear down the old set-up and put a new one in place. That's where the trusty staff of SBCRI comes in. Pictured from left to right:

1. Monkey business. A fearless Michael Oftedahl perches on a system of trusses to secure a steel beam. Note his harness and safety

glasses for protection. It's a long way down! Not to be outdone, Kirk Grundahl performs a death-defying stunt by balancing on one foot.

2. "Big guy in a little coat." Facility manager Keith Hershey shows off by squeezing his athletic frame into a machinist's coat.

3. Mad scientist. Dan Hawk peers between two steel beams to watch wiffle trees bear down on a truss system while simultaneously executing the test from his computer. **SBC**
